

Fizz Colours

Fizz is a multifunctional, PEFC uncoated range of coloured papers that includes a carnival's worth of soft, pastel and bright shades to catch the eye, modify the mood or change the pace of printed documents. Choose from 13 colours, from pastel shades to dazzling bright yellow. Fizz colours are outstanding on high volume office copiers and laser printers as part of a suite of corporate stationery. And they can make an even bigger impact in corporate literature when used alongside neutral shades.

Tinted stock is a must in any designer's palette. In prestige publications, a switch in colour can signal a change in tone or content – to the financial section in an annual report and accounts, for example. And printing on a tinted sheet – rather than printing the background colour on a white stock – is a surefire way to get colour that's 100% consistent, from page to page. In more everyday items such as flyers and forms, where colour printing isn't an option, take your pick from Fizz colours and make the everyday a little more memorable.

Product features and benefits:

Accredited to the Programme for the Endorsement of Forest Certification schemes

Manufactured to the international environmental standard, ISO 14001

Totally Chlorine Free bleaching process

Guaranteed for laser and inkjet printing

Environmental statements:

When printing on Fizz, you may wish to include a combination of the following environmental statements on your work. Fizz:

- contains material sourced from responsibly managed and sustainable forests, certified in accordance with the PEFC (Programme for the Endorsement of Forest Certification schemes)
- is manufactured to the ISO 14001 international standard, minimising negative impacts on the environment

PEFC logo usage guidelines:

The PEFC logo can be used on publications printed on Fizz. Should your company or printer have certification to the standard, you can use the PEFC logo as outlined in the logo usage guidelines found in the PEFC information CD. An example of its use is shown below:
